ABOUT MENZIES:

As one of Australia's leading medical research institutes dedicated to improving the health and wellbeing of Aboriginal and Torres Strait Islander Peoples, and a leader in global and tropical research into life-threatening illnesses, Menzies School of Health Research continues to translate its research into effective partnerships and programs in communities across Australia and the Asia-Pacific region.

SUMMARY OF THE POSITION:

The Senior Veterinary Technician will work closely with the Ministry of Agriculture, Livestock, Fisheries and Forestry and other collaborators to address priority One Health issues including antimicrobial resistance (AMR), zoonotic infections, and priority diseases affecting food production and food safety.

The role involves implementing data collection and project activities under Research Excellence and Surveillance to Promote One Health Solutions for Timor-Leste and the region (RESPOSTA) with support and leadership from the Menzies' Animal Health Lead, Animal Health Coordinator and Veterinarian.

The position will be based in Dili, Timor-Leste. It will also involve regular travel to other municipalities in Timor-Leste for up to 5 days at a time.

PRIMARY RESPONSIBILITIES:

The following key responsibilities are not exhaustive and may include others as directed by the Research Coordinator at Menzies School of Health Research Timor-Leste Office.

1. Conduct field data collection, through working with farmers, traders, NDV, municipal animal health services and other stakeholders
2. Coordinate and train NDV and municipal animal health service staff on fields sampling protocols Lead the preparation, packing and storage of sampling equipment and reagents for field sample collection
3. Communicate with Veterinary Diagnostic Laboratory and other laboratories on the schedule for sample collection, sample receipt and reporting of results
4. Engage with farmers and stakeholders to promote sample submission to VDL
5. Implement electronic data collection systems, perform data entry and conduct analysis on collected data for reporting
6. Conduct interviews and engagement sessions to gain a deeper understanding on various One Health issues
