### ABOUT MENZIES:

As one of Australia's leading medical research institutes dedicated to improving the health and wellbeing of Aboriginal and Torres Strait Islander Peoples, and a leader in global and tropical research into life-threatening illnesses, Menzies School of Health Research continues to translate its research into effective partnerships and programs in communities across Australia and the Asia-Pacific region.

### SUMMARY OF THE POSITION:

The Animal Health Coordinator will support management and implementation of One Health project activities under Research Excellence and Surveillance to Promote One Health Solutions for Timor-Leste and the region (RESPOSTA). This includes providing mentorship, operational and technical leadership on data collection and project implementation.

The role involves working closely with the Ministry of Agriculture, Livestock, Fisheries and Forestry, the Ministry of Health, local leaders and stakeholders at the project sites. The role will also include opportunities to provide technical and operational leadership to other research or capacity building projects.

The Technical Advisor is expected to travel to project implementation sites outside of Dili regularly for up to 5 days at a time to maintain regular communication with stakeholders and provide technical leadership for implementation.

### PRIMARY RESPONSIBILITIES:

The following key responsibilities are not exhaustive and may include others as directed by the Research Coordinator at Menzies School of Health Research Timor-Leste Office.

1. Providing oversight coordination and management of animal health project activities under RESPOSTA
2. Provide input and leadership on the design and implementation of project activities
3. Become the focal point for animal health activities and facilitate coordination between different stakeholders for implementation of project activities, while maintaining a positive relationship
4. Work collaboratively with the Animal Health Lead, Senior Project Co-ordinator and Project Manager to monitor and report on project progress towards stipulated output and outcomes
5. Assist the Animal Health Lead, Senior Project Co-ordinator and Project manager with reporting requirements for funders, collaborators and internal Menzies purposes, including the preparation of written reports on projects findings and progress updates.

6. Work closely with the RESPOSTA Human Health Coordinator to implement the project with a One Health approach
7. Ensure compliance with ethical guidelines and regulatory standards in the conduct of research.
8. Monitor and evaluate team performance, providing feedback and mentoring to support professional growth and development.
9. Support the project team to ensure that good quality data collection and entry is maintained.
10. Together with the Project Leads and Animal Health Lead, strengthen One Health collaboration in AMR, zoonotic infections, and priority diseases affecting food production and food safety in Timor-Leste
11. Any other tasks as reasonably required by the supervisor, country manager and project leads.
