The Learning and Teaching Framework

1. Curriculum and Planning. Curriculum defines what it is that students should learn, and the associated progression or continuum of learning. At Flinders we understand it is every teacher's professional responsibility to ensure they have lesson plans in place. "Although years of experience can shore up less-than complete planning, nothing compares to well-planned lessons. Comprehensive plans increase the likelihood that lessons run smoothly so that students receive quality instruction" (Cunningham, 2009, p. 105).
2. Pedagogy - describes how students will be taught and supported to learn. At Flinders, we also understand that good teaching cannot be reduced to a single technique; good teaching comes from the identity and integrity of the teacher (Palmer, 2000, p. 170). Our identity in Christ is the foundation for good teaching. Because we seek to develop the identity and integrity that good teaching requires, we must talk bravely to each other about our faith, pedagogy, struggles, mistakes, opportunities and successes.
3. Assessment - identifies how well a student has (or has not) learnt specified content. At Flinders we also understand that "assessment can be considered feedback orientated towards the teacher about which students are moving towards the success criteria, which teachers have/have not taught well and the strengths and gaps of their teaching" (Hattie, 2011, p. 141).
4. Reporting - explains to the student and the teacher where a student is on a learning continuum at the end of a specified period of schooling, and where this places them in relation to their own learning goals, the learning of their peers and Victorian Curriculum Standards.
5. Kinder@Flinders. A safe, nurturing environment. Kinder@Flinders provides a safe, nurturing environment and learning community that fosters the growth of the God-given gifts and talents of every child. We believe every child is precious and uniquely created by God. The relationship fostered by staff with children establishes the basis upon which significant learning can take place.
